

List tags:

- OL (Ordered List)
- UL (Unordered List)
- DL (Definition/Descriptive List)

1) OL (Ordered List):-

→ OL tag is used to allotting numbers for points.

→ 1, 2, 3, ... (default).

A, B, C, ...

I, II, III, ...

i, ii, iii, ...

Li (List Item)

→ used to print the data in points wise.

→ "OL" is parent tag and "li" is child tag.

→ both are paired tags & block level tags.

eg:- <!DOCTYPE html>

<html lang = "en">

<head>

<title> Ex10 </title>

</head>

<body>

<h3> Demo on ordered list (numbering) </h3>

 data1

 data2

 data3

<hr> tag. horizontal row.

<hr> -> it draws a line horizontally ->
