

<!-- Example on header, main, nav, section, aside, article & footer tags -->

these all tags xerox copy of div tag.

Ex. <head>
<title> EXGO </title>

</head>

<body>

<header>

<!-- place logo, name, search box, login, date & time, :- these are possible -->

Navigation

</header>

<nav> => one place to another place.

<!-- place here menu bar designing (hyperlinks) -->

</nav>

<main>

<section>

<!-- It contains some part of data -->

</section>

<aside>

<!-- It contains sub content, banners/ads -->

</aside>

</main>

<article>

<!-- place here was articles (best example newspaper) blogs </article>

< footer >

< ! -- It contains allones , sm links , map , term & condition , copy rights -- >

< / footer >

< / body >

< html >

parent tag

child tag.

< ! -- Example on figure & figcaption tags -- >

=> figure -> inside < div > < img > is there - difficult in identification .

=> both are paired & block level tag .

Eg: < head >

< title > EX60 < / title >

< base href = " https : // source . unsplash . com / 400 x 200 " >

< / head >

< body >

[< div style = " display : flex ; " >

< figure >

< img src = " ? car " >

< fig caption > my first car < / fig caption >

< / figure >

< figure >

< img src = " ? animal " >

< fig caption > Animal my pets < / fig caption >

< / figure >

<figure>

<figcaption> Hill </figcaption>

</figure>

</html>

#eg:- <!-- Examples on audio & source tags -->
parent tag & inline tag

<head>

<title> EX62 </title>

</head>

<body>

<h3> demo on playing audio </h3>

<audio controls>

<source src = "Naa Naa Krte Pyar . mp3" type =
"audio / mp3">

or

<source <audio control src = "Danger bill a.
mp3"> </audio>

<audio controls muted autoplay loop>

<source src = "Badass . mp3" type = "audio / mp3">

</audio>

</body>

</html>

Eg:- <6- Example on video & source. -->

<body>

<h3> demo on playing video </h3>

① <video controls>

<source src = "video playback .mp4" </video>

② Q8

<video controls src = "Beast mode .mp4" muted
autoplay loop </video>

<video controls poster = "Sailor .gif" >

<source src = "humkum .mp4" type = "video /mp4">

<!--<track src = "a .mp3">-->

</body>

</html>
