

Example on details & summary tags --

```
<body> <head>
<title> EX56 </title>
</head>
<body>
```

```
<option> white Apple </option>
<option> Black Apple </option>
</data list>
</body>
</html>
```

Example on details & summary tags --

```
</head>
<body>
<details>
<summary> colors </summary>
<ul>
<li> Red </li>
<li> green </li>
</ul>
</details>
```

```
<details>
<summary> Images </summary>
<div>
<img src = "copy path"
</div>
</details>
</body>
```

Examples on mark, bdi & base tags →

mark → highlight the text nature of tag paired inline.

eg:- This is my book.

<body>

<p> Editplus is <mark> not free software. </mark>

</p>

</body>

Bdi → Bidirectional:

→ right to left alignment text & change to left to right

L ← R

L → R

→ nature of tag paired & Inline.

eg <body>

<bdi> red apples </bdi>

</body>

Base:

Base is sub tag of <head> tag
→ used to make setting to URLs

eg <head>

<title> EX57 </title>

<base href = "https://www.sitename.com/
images/"

</head>

<body>

Q2) ``
`<img src = "400x200?water" car food? 150 + -`
`</body>`
`</html>`

Example on output tags --

- Output tag use to display port output
- developed for javascript purpose.
- within the same page output.
- nature of tag paired & inline.

eg:- `<body>`

`<output> hello world </output>`

`
`

`<button onclick = "document.write ('button clicked')"> click here. </button>`

`
`

`<button onclick = "Op. value = " > button press here`

`</button>
`

`<output id "Op"> </output>`

`
`

`<button onclick = "dt.value = new Date ()">`

`show date </button>`

`<output id = "dt"> </output>`

`</body>`

`</html>`

Iframe :- (inline frame)

⇒ one web adding to the another web page is called merging.

→ used to embed four inline frame → webpage, image, video, map.

→ nature of tag is paired & inline.

Example on iframe tag - ->

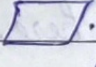

Ex. <head>

<title> EX59 </title>

</head>

<body>

<h2> demo on frame </h2>

<iframe> </iframe> → o/p 

<iframe src = "ex58.html" > </iframe>

<iframe src = "ex57.html" > </iframe>

or

<iframe src = "ex57.html" frameborder = "0">
</iframe>

<iframe width = "500" height = "360">
